Planner

Undated · weeks start Sunday · made for reMarkable Paper Pro

HOW IT FLOWS

1
Capture

Heard about a deadline? Write it on the Deadlines page right away. Don't plan it yet, just get it out of your head.

2
Map the month

Copy the big dates onto the Month page. Crowded weeks become obvious before they arrive.

3
Block the week

Each week, copy what's due into the DUE strip, then block sessions for each subject in the hour grid.

4
Follow through

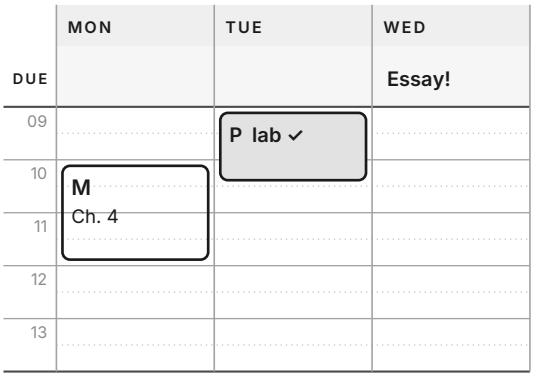
Tick blocks as you finish them. Tick Done in the tracker when it's handed in.

SUBJECT KEY

CODE	SUBJECT / PROJECT	HRS / WK

Give each subject or project a 1–2 letter code. Blocks on the Week page are narrow, so the code is all you need to write.

DRAWING A BLOCK



Box = planned session (code + what)
Shaded + ✓ = done
Due strip = hand-in that day

WEEKLY RESET · 10 MINUTES, SAME DAY EACH WEEK

1. Empty your head: every new deadline goes onto the Deadlines page
2. Copy this week's due dates into the DUE strip on the Week page
3. Mark the fixed things first: classes, shifts, meetings
4. Block study and work sessions; put the hardest subject in your best hours
5. Leave one or two empty blocks as buffer, then tick Planned in the tracker

Each month in this pack: Month · Deadlines · 5 × Week. Nothing is pre-dated: write dates in the boxes.
